

Hangar bolt set simplifies installation

AEROCOMPACT optimises hangar bolt for PV installation on corrugated fibre cement and sheet metal roofs

Satteins, Austria, 10 June 2022. The Austrian manufacturer of PV mounting solutions AEROCOMPACT has added a new hangar bolt set to its CompactPITCH modular system. Since it has improved the angle attachment of the CompactPITCH XWS, PV mounting rails can be positioned directly above the hangar bolt – in contrast to the current solution. “The centric load application in the axial direction of the hangar bolt prevents a superimposed bending moment. This improves the system’s ability to withstand high snow and wind loads,” explains Philipp Pejcl, product manager at AEROCOMPACT. The hangar bolt can be used for installing solar systems on corrugated fibre cement and trapezoidal sheet metal roofs.

Quick and easy installation

As usual, AEROCOMPACT offers different installation options with different hangar bolt set lengths as part of its modular system. The improved module can be connected to the X40 and X50 mounting rails using either a hammerhead screw or a click attachment. AEROCOMPACT manufactures the hangar bolts from cast steel with a zinc flake surface coating in accordance with DIN EN ISO 9227.

The hangar bolt set is now available throughout Europe. AEROCOMPACT has stored it in AeroTool, its planning and engineering software. The company provides a 25-year warranty.

AEROCOMPACT at Genera in Madrid

At the trade fair Genera, which will take place in Madrid from 14 to 16 June 2022, AEROCOMPACT will present its solutions at stand 10C02, hall 10.

About AEROCOMPACT

AEROCOMPACT was founded in 2014 in Austria and the USA. The company produces and sells PV mounting solutions for flat roofs, pitched roofs and metal roofs, as well as for ground-mounted systems. The company has locations in Austria, the USA and India and an additional 14 sales offices around the world. In total, the company employs around 100 people worldwide.
